IMPORTANT NOTICES FOR PURCHASERS

IMPORTANT NOTICE TO PROSPECTIVE BUYERS OF **GEMSTONES/JEWELS**

We recommend that you view any items you intend to purchase as refunds will not be given for buyer's remorse. This doesn't affect your statutory rights.

Notes 1 - Coloured Gemstones

Purchasers are advised that whilst great care has been taken in the examination of gemstones, it is not possible to test every gemstone within the constraints of time and equipment available outside of laboratory conditions. Any gemstone not provided with a laboratory report has been assessed by Fellows within the limitations of any mounting and an opinion has been given where possible.

Historically, many coloured gemstones have been subjected to a variety of treatments designed to enhance their appearance. Certain enhancement methods, such as heating, are routinely used to other aspects of rubies, sapphires, and other gemstones. Oiling is often undertaken to enhance the clarity of emeralds. The international jewellery trade has generally accepted these and other enhancement methods. Some treatments are permanent whereas others may only be semi-permanent, possibly requiring further re-treatment in order to retain their appearance

Because of the widespread variety of treatments within the jewellery industry, prospective purchasers should assume that all gemstones will have been treated unless statements are made to the contrary. Gemmological reports from internationally recognised Gemmological Laboratories will be noted in the item description where available.

Note 2 - Diamonds

Advancements in technology have led to some diamonds being treated in a number of ways, all designed to improve their appearance or alter their colour. Processes include but are not necessarily limited to: fracture filling, laser drilling, a combination of drilling and filling, HPHT treatment, irradiation and various coatings. Buyers are also alerted to the fact that synthetic diamonds are now produced in large quantities. Whilst every effort is made to identify or disclose treated and synthetic goods, it is not possible for Fellows to guarantee that all diamond set lots do not contain such material.

Fellows do not knowingly offer treated diamonds for sale, unless a germological opinion disclosing the type of treatment has been obtained and the treatment would be stated within the item description.

Note 3 – Weights and Measures

Estimated Diamond weights, colours and clarities (see Notes on Diamond Grading terms opposite) given by Fellows are intended as guides for prospective purchasers, with the given limitations of mounts and settings, and are opinions only, not guaranteed by Fellows.

Weights of coloured gemstones offered are extrapolated on the estimated dimensions, using trade standard formulae. Due to the traditional cutting techniques for coloured genstones it is possible there may be discrepancy between the stated estimate and the unmounted weight. Fellows uses a Thermo Scientific Nitron Handheld XRF Analyser to test metals

reliave daes of memory similar for a memory and the second second

Lengths and weights provided are estimates only.

The information stated in reports is the opinion of the respective laboratory and is not necessarily the opinion of Fellows auctioneers.

Note 4 - Condition Reports

Statements in the catalogue regarding the condition of lots in this sale may appear in the description, however, the absence of such a reference does not imply a lack of damage or wear, or lack of any further faults within the piece.

Please note that Fellows offer condition reports on almost every lot offered. Our condition reports are the opinion of Fellows and should only be referenced as a guide. We highly recommend that a prospective buyer views in person or sends a representative to satisfy themselves to the condition, originality and suitability of a piece(s) before bidding.
